H. TRANSPORTATION

PROJECT TITLE:  Traffic Signalization Projects – FY 2011
RESPONSIBLE DEPARTMENT:  Engineering

PROJECT FUNDING:  $400,000

FIRST YEAR ESTIMATED OPERATING COSTS:  None

PROJECT DESCRIPTION:
This annual project provides for the installation of new traffic signals at needed points throughout the Town of Cary. Funds are also used to convert existing traffic signals to metal poles and mast arms as necessary. Decisions on where new signals are to be converted are based on signal studies analyzing signal warrants. The criteria for new installations are that they be suspended via metal poles and mast arms.

PROJECT JUSTIFICATION:
This project ensures that funding is available for the installation of needed traffic signals on Town maintained streets. The project’s primary focus is to satisfy safety needs of existing citizens while improving visual appearance.

PROJECT LOCATION:
This project will occur in various locations as the need arises.
